## EXPERIENCE

### Freelance Web Developer — Charlotte, NC

- **M&O Landscaping** - Web Developer  
Developed a multi-page site based on clients business needs to expand and grow in the Charlotte Metro market. I designed the overall concept and design and then implemented the design using the CSS Grid spec and flexbox for a responsive mobile friendly site.
- **Arya Creative** - Web Developer  
Developed landing and multi-page sites for various clients based on designs from psd files and templates. Work with clients and designers in discovery phase to ensure product meets execution budget and timeline.
- **Big Idea Group** - Web Developer  
Temp position where I developed HTML5 emails, blog posts, and HTML5 Ad Banners for multiple clients working off of PSD files from design team. Used Salesforce CRM, Constant Contact, MailChimp, Email on Acid.
- **Gin Mill Southend** - Web Developer  
Worked with client to develop a website for their new location. Site uses wordpress for CMS and a third party template for site structure.

### Teaching & Speaking — Charlotte, NC

- **Tech Talent South:**
  - **Code Emersion**  
A full-stack development class that focuses on Ruby on Rails, Javascript, HTML, CSS, application development, domain modeling, APIs and RESTful design, version control with Git, and deployment.
  - **Advanced JS and React**  
A course for Davidson College designed to teach ES6 Javascript and React with Redux. Students learn the basics of React application development using npm, Babel, Webpack, node.js, Chrome Dev tools, and git.
  - **Intro to Web Design and Development**  
Students learn the fundamentals of design and how to implement designs into a finished website using HTML, CSS, JS, and Bootstrap.
- **Meetups** - Tech Talent South
  - **Javascript Basics**  
Lead multiple meetups with TTS to teach the history of Javascript and Javascript basics to give attendees a broad overview of the web's most powerful language.
