EXPERIENCE

Ritz Marketing — UX/Web Developer – Charlotte, NC

- Meet with clients to determine project requirements and user needs
- Illustrate designs via storyboards, sitemaps, and wireframes
- Develop prototypes and Mockups with Figma and Vue/NuxtJS
- Take design decisions and develop into production code using a variety of frameworks and libraries per the projects spec
- Collaborate with graphic designers and project managers to ensure project quality and timelines are met.
- Develop an agile approach to design process and help to modernize the project management workflow for entire digital team
- Incorporate Google Analytics and Adwords to give clients maximum ROI and drive design decisions

Freelance Web Developer — Charlotte, NC

- **M&O Landscaping**– Web Developer | May 18' - Current
Developed a multi-page site based on clients business needs to expand and grow in the Charlotte Metro market. I designed the overall concept and design and then implemented the design using the CSS Grid spec and flexbox for a responsive mobile friendly site.
- **Big Idea Group** – Web Developer | Dec. 17' 2wk. temp
Temp position where I developed HTML5 emails, blog posts, and HTML5 Ad Banners for multiple clients working off of PSD files from design team. Used Salesforce CRM, Constant Contact, MailChimp, Email on Acid.
- **Gin Mill Southend** – Web Developer | Aug. 17' - current
Worked with client to develop a website for their new location. Site uses wordpress for CMS and a third party template for site structure.

Teaching & Speaking — Charlotte, NC

- **Tech Talent South:**
 - **Code Emersion** June 18'
A full-stack development class that focuses on Ruby on Rails, Javascript, HTML, CSS, application development, domain modeling, APIs and RESTful design, version control with Git, and deployment.
 - **Intro to Web Design and Development** March 18' - Oct 18'
Students learn the fundamentals of design and how to implement designs into a finished website using HTML, CSS, JS, and Bootstrap.
- **Meetups: Javascript Basics**
Lead multiple meetups with TTS to teach the history of Javascript and Javascript basics to give attendees a broad overview of the web's most powerful language.

EDUCATION

Udacity -
Frontend Web
Development Nanodegree:

Learned how the web works by designing and developing responsive, mobile first web applications and websites using HTML, CSS, and Javascript. I also learned and used Bootstrap, Jquery, Git, Grunt, Jasmine, KnockoutJS, and Google Developer tools to measure and optimize site performance.
